DETAILED ACTION

1. This is the first Office Action on the merits of Application No. 10/719,658 filed on 11/20/03.

2. Receipt is acknowledged of the Preliminary Amendment filed on 9/10/04. Claims 16 and 17 have been amended accordingly. Claims 1-29 are currently pending.

Election/Restrictions

3. Applicant's election with traverse of the species including claims 1-23 (the amended claims 16-23 depend from claim 1, which is part of the elected species) in the reply filed on 9/10/04 is acknowledged. The traversal is on the ground(s) that claims 16 to 29 in connection with claim 1 arise from a single inventive concept, namely, that dependent on the operation of the brake and/or gas pedal a glide operation is initiated or ended. This is not found persuasive because claim 1 recites a method of controlling a clutch and also controlling an engine based on the operation of the clutch while claim 24 recites a method of controlling a clutch based on engine braking which is patentably distinct species part of the elected species of claim 1. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

The requirement is still deemed proper and is therefore made FINAL.

4. Claims 24-29 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected species, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 9/10/04.

Application/Control Number: 10/719,658

Art Unit: 3681

Specification

5. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

6. The abstract of the disclosure is objected to because it has more than one paragraph.

Correction is required. See MPEP § 608.01(b).

Claim Objections

- 7. Claims 12, 13 and 23 are objected to because of the following informalities:
 - Claim 12, line 2, "of" should be changed to --or--.
 - Claim 13, line 2, a comma should be inserted after "clutch".
 - Claim 23, lines 3-4, "a higher transmission ratio than has been stored in memory" should be changed to --a transmission ratio higher than the stored transmission ratio--.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

8. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Page 3

Application/Control Number: 10/719,658 Page 4

Art Unit: 3681

9. Claims 1-23 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

- Claim 1 recites the limitation "the brake pedal" in line 13 and lines 15-16. There is insufficient antecedent basis for this limitation in the claim.
- Claim 20 recites the limitation "the electric control unit" in line 3. There is insufficient antecedent basis for this limitation in the claim.

Allowable Subject Matter

- 10. Claims 1-23 would be allowable if rewritten or amended to overcome the rejection(s) under 35U.S.C. 112, 2nd paragraph, set forth in this Office action.
- 11. Applicant is reminded to either cancel claims 24-29 or amend them to be dependent from the allowable claims.

Cited Prior Art

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure: Tellert'183, Kurihara et al'305, Wakahara et al'831, and Ohkumo et al'127 which each shows a system for controlling a clutch such that the clutch is engaged when the vehicle speed is greater than a threshold value.

Communication

13. Submission of your response by facsimile transmission is encouraged. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 872-9326 for regular communications and (703) 872-9327 for After Final communications. Recognizing the fact that

Art Unit: 3681

reducing cycle time in the processing and examination of patent applications will effectively increase a patent's term, it is to your benefit to submit responses by facsimile transmission whenever permissible. Such submission will place the response directly in our examining group's hands and will eliminate Post Office processing and delivery time as well as the PTO's mail room processing and delivery time. For a complete list of correspondence not permitted by facsimile transmission, see M.P.E.P. 502.01. In general, most responses and/or amendments not requiring a fee, as well as those requiring a fee but charging such fee to a deposit account, can be submitted by facsimile transmission. Responses requiring a fee which applicant is paying by check should not be submitting by facsimile transmission separately from the check. Responses submitted by facsimile transmission should include a Certificate of Transmission (M.P.E.P.. 512). The following is an example of the format the certification might take:

hereby certify that this correspondence is being facsimile transmitted to
he Patent and Trademark Office on
(Date)
Typed or printed name of person signing this certificate:
<u> </u>
(Signature)

If your response is submitted by facsimile transmission, you are hereby reminded that the original should be retained as evidence of authenticity (37 CFR 1.4 and M.P.E.P.. 502.02). Please do not separately mail the original or another copy unless required by the Patent and Trademark Office. Submission of the original response or a follow-up copy of the response after your response has been transmitted by facsimile will only cause further unnecessary delays in the processing of your application; duplicate responses where fees are charged to a deposit account may result in those fees being charged twice.

Any inquiry concerning this communication or earlier communication from the examiner should be directed to Examiner Ho whose telephone number is (703) 305-0738. The examiner can normally be reached on Monday-Friday from 7:30 A.M. to 5:00 P.M. Eastern Standard Time. If attempts to reach the examiner by phone are unsuccessful, the examiner's supervisor, Mr. Charles Marmor, can be reached at (703) 308-0830. Any inquiry of a general nature or relating to the status of this application or proceeding should directed to the Group receptionist whose telephone number is (703) 308-2168.
